Building a Heresy Force

Introduction

The following information is designed to assist players in creating a valid Heresy era army using the Horus Heresy Supplement and the Net Epic Armageddon rule set. The purpose of the page is demonstrate how an army can be constructed using the available options across the supplement. This article does not factor any particular tactics or thematic considerations. Simply, how the pieces fit.

To set the scene, I am building this first list for a 4000 point game representing an encounter battle between two opposing forces who will contest the five standard victory conditions found in [Section 6.1.7](#) of the Net Epic Armageddon rule book.

Choosing a list

First you need to select a list that appeals to you. For the purposes of this page, I have selected to play a Traitor Legion, the Death Guard. A Loyalist or Traitor Legion utilises the [core Legion List](#) as the foundation for your options. By electing to tailor my Legion to the Death Guard I alter the characteristics of the Core Legion list. For example, the core Legion already has a Legion Terminator Detachment as a Line Detachment choice, however, the Death Guard Legion Terminator Detachment entry replaces the Legion Terminator Detachment entry in the Core List.

Unique Legion formations overlay across the top of the entries found in the Core Legion list, in this instance the Legion Terminator and Legion Primarch are replaced with the entries from the Death Guard list variation.

Where previously my Legion Terminator Detachment looked like this:

Detachment	Unit	Upgrades	Cost
Legion Terminator Detachment	4-6 Terminator units	Drop Assault OR Assault Claw OR Heavy Transport OR Teleport, Centurion OR Praetor, Armoury Assets, Dreadnought, Hyperios, Tank	75 pts each

Your Legion Terminator Detachment entry would now look like this:

Detachment	Unit	Upgrades	Cost
Legion Terminator Detachment	4-6 Legion Terminator OR Grave Warden Terminator units	Drop Assault OR Heavy Transport OR Teleport, Centurion	Terminator 75 pts each Grave Warden 80 pts each

Additionally, I gain two previously unavailable formations as Support Detachments, a Destroyer Detachment and a Deathshroud Terminator Detachment. The Death Guard variation also includes changes to my Allies and how well they work with my Death Guard force but we will address that further along.

Choosing Line Detachments

In a 4000 point game it is common but not mandatory to purchase three Line Detachments, three Line Detachments provides you with a number of flexible formations to adapt to your style of play or tactical plan. Additionally, Supreme Commander upgrades will generally only be available to Line Detachments or a Lord of War formation.

However, the key outcome of each Line Detachment is that it enables you to purchase a total of three Support Detachments per Line Detachment.

For my Death Guard force I am going to choose the following formations:

Legion Breacher Detachment
Legion Tactical Detachment (8 Tactical Marines)
Legion Terminator Detachment (4 Legion Terminators)

Of the 4000 points available for my army, I have now spent a total of 900 points and have the ability to select up to nine Support Detachments from the amended core Legion list. I can upgrade these formations as well, however, we will come to that further on.

Choosing Support Detachments

With over 3100 points still available, I can now look at the available options for my nine possible Support Detachments. In this example, I will purchase the following units:

Legion Predator Strike Squadron (4 Legion Predators)
Legion Reconnaissance Squad
Legion Javelin Attack Squadron
Legion Vindicator Squadron

This costs me a total of 865 points and uses four of my nine available Support Detachment slots. So far I have spent a total of 1765 points on formations and still have plenty of points available for Lords of War, Allies and Upgrades.

Choosing Lords of War and Allies

Lords of War and Allies both share the same portion of my armies points value, each list will specify what portion of your points value you can spend on these types of formations. The Death Guard are able to spend 1/3 of their armies total points on formations from the Lords of War section of the core Legion list or available Allies army list. In this example, I have around 1200 points available to spend on Lords of War or Allies formations. Lords of War represent rare formations while Ally formations are those from another army list not native to the Legion.

So, for my Death Guard I have selected the [Legio Titanicus](#) army list as my Ally. I can now spend a total of around 1250 points on core [Legion Lords of War](#) formations or [Legio Titanicus](#) formations. As the Death Guard have worked with the Titan Legions on a number of occasions, they have developed an appropriate level of interoperability when working together, this results in them being cohesive allies and avoids the negative effects of a disruptive ally.

Reviewing Lords of War section of the core Legion list, I select the following:

Xiphon Interceptor Attack Wing
Mortarion, the Pale King

I then peruse the [Legio Titanicus](#) list to assess my available options. When selecting from an Allies army list, the restrictions for Line and Support Detachments remain, you must select a Line Detachment from the Allies army list to be able to take a Support Detachment from the Allies army list. However, in this instance, [Legio Titanicus](#) doesn't have Support Detachments so I do not have to factor this in.

So, I finally choose the following formation from my Allies army list:

Warhound Scout Pack

The total points for my Lords of War/Allies section is formation 1200 points and brings my total points spent on Allies and Lords of War to the approximate 1/3 amount available in a 4000 point army, around 1250 points.

Upgrading formations

So far I have spent 2965 points on my formations, this leaves me with just over 1000 points to enhance the formations I have available in my force. When purchasing upgrades, you can only take one upgrade, once per formation.

To enhance my Breacher Detachments chance of survival I purchase the Heavy Transport upgrade for the formation:

Name	Description	Cost
Heavy Transport	Add enough Land Raider Proteus OR Land Raider Phobos OR Spartan Assault Tanks to transport the formation	Phobos 75 pts each Proteus 75 pts each Spartan Tank 125 pts each

As part of my selection, I choose to purchase 4 Land Raider Proteus to transport the 8 Breacher Marines in the Detachment. I must purchase enough transports to transport all of the units within the Detachment, resulting in 4 Land Raiders for a total of 300 points.

To provide me with some further protection for my Tactical Detachment I purchase another Heavy Transport upgrade, but this time 2 Spartans. I also purchase a Hyperios upgrade to provide me with some air defence capabilities.

Name	Description	Cost
Hyperios	Add 1 Hyperios Whirlwind unit	75 pts

This costs me a total of 325 points.

Finally, I purchase a Teleport upgrade for my Legion Terminator Detachment and another Teleport upgrade for Mortarion at a cost of 50 pts each formation.

Name	Description	Cost
Teleport	Add the Teleport special rule to each unit in the formation	50 pts

In total my upgrades so far have cost me 725 points, leaving me with 290 points for additional units or upgrades, I have already utilised my points allocation for Lords of War and Allies, so I can either purchase further upgrades to my existing formations and/or another formation. To round out the points cost, I choose a Legion Predator Strike Squadron (4 Legion Predators) for exactly 240 points and upgrade my Legion Breacher Detachment with a Centurion upgrade (Chaplain) for 50 pts.

Conclusion

My force now looks like:

Legion Breacher Detachment in 4 Land Raider Proteus with a Centurion (Chaplain) (325 + 300 +50 pts)

Legion Tactical Detachment (8 Tactical Marines) in 2 Spartans with a Hyperios (275 + 250 + 75 pts)

Legion Terminator Detachment (4 Legion Terminators) with Teleport (300 + 50 pts)

Legion Predator Strike Squadron (4 Legion Predators) (240 pts)

Legion Predator Strike Squadron (4 Legion Predators) (240 pts)

Legion Reconnaissance Squad (150 pts)

Legion Javelin Attack Squadron (275 pts)

Legion Vindicator Squadron (200 pts)

Xiphon Interceptor Attack Wing (250 pts)

Mortarion, the Pale King (400 + 50pts)

Warhound Scout Pack (500 pts)

3 Line Detachments, 5 Support Detachments, 1250 points worth of Lords of War and Allies all under 4000 points and ready to march to war.

Epic Battles in the Age of Darkness

Heresy Tournament Scenario

Heresy Tournament Scenario

Heresy Tournament Game Rules

The heresy tournament game rules are designed to be used in conjunction with the Epic heresy supplement army lists. They will allow two players to fight an evenly balanced battle with little or no preparation. They are ideal for pick-up games at clubs or shows, and provide an evenly balanced contest in tournaments. In many ways, tournament games represent the most “basic” form of game play, and are designed to be as easy and accessible as possible in order to allow Epic players to play games with the minimum of fuss. Because of this, the tournament rules require little or no preparation other than picking forces from the army lists. Many scenarios will use conventions described in this section of the battles in the age of darkness.

Forces

Both players pick armies of 4,000 points using the heresy supplement army lists. It is possible to play games using the tournament rules for larger or smaller games than this, but please note that the army lists have been balanced assuming that armies will fall within this range, and this means that larger or smaller games may be slightly unbalanced.

Set-Up

Set up the terrain for the game in any mutually agreeable manner. If one player sets up the terrain then his opponent may choose where to deploy. If you set up the terrain as a joint effort or it was set up by a tournament organiser then the player with the higher strategy rating may choose the table edge he sets up on. If both players have the same strategy rating, then dice to see who gets the choice of table edge. You can pick a long edge, or a corner (half way up each long and short edge). The opponent sets up on the opposite edge or corner. The tournament game rules have been designed to be played on tables that are 90–150cm wide by 150–240cm long (that’s 3–5 feet by 5–8 feet for you non-metric types!) The ideal size is round-about 120cm by 180cm (4 feet by 6 feet). It is possible to play games on tables that are wider or longer than this, but this may favour certain armies and could lead to an unbalanced game.

The Five Minute Warm-Up

Tabletop miniatures wargaming is not an exact science. One person’s line of sight is another’s blocked line of fire, some people love pre-measuring, others hate it, and so on. Because of this after you have set up the terrain for a game you should spend five minutes going through things like how the line of fire rules will work, how the terrain features used will work, and so on. Here are some of the things you may want to discuss:

5 minute warm up topics

- The “Counts As” Rule (see 6.2.1).
- Lines of Sight and Lines Of Fire.
- Fire Arcs on units.
- Pre-measuring.
- Templates and if units are “in or out”.
- Terrain features—what do they count as on the terrain chart, when are units “in” terrain.
- How you will show if a formation is broken, in overwatch or has marched this turn.
- Should you dice for each ability used at the start of the turn?
- Are transported units considered to be in specific transporting units of their formation?
- When disembarking, are transported units placed completely within 5cm of the transport unit or just so one part of the transported unit is within 5cm of the transport unit?
- When does a unit count as being in cover?
- How many units can claim cover from a armoured vehicle, war engine, or terrain feature?
- Does the charging formation need to get within 15cm of the original target or can it get within 15cm of any intermingled formation?
- How are attacks with special abilities like ignore cover and lance allocated in an assault?
- Is it possible to air assault into a formation which is completely covered by the zone of control of another formation?
- Where should measurements for capturing/contesting an objective be made from?
- What house rules do you normally play with?
- Are you using the “counts as” rule?
- What is your army capable of (units, weapons and special rules)?
- Anything else you can think of!

Place Objective Markers

Take it in turns, starting with the player with the higher strategy rating, to place one objective marker on the table. If both players have the same strategy rating then dice to see who places the first objective marker. The first objective a player sets up must be placed on their own table edge. The remaining two objectives must be set up in their opponent’s half of the table, at least 30cm away from the opponent’s table edge and 30cm away from any other objectives that have already been placed. Keep placing objectives until six objective markers have been placed on the table in total. You can use anything as an objective marker but we would suggest using terrain pieces to represent them if you can. In our games, we’ve found that battling over an actual bunker or fuel dump is far more appealing than having your forces sell their lives for a cardboard counter! You capture an objective if you have a unit within 15cms of it in the end phase and your opponent does not. An objective is contested if both sides have a unit within 15cms of it in the end phase. Units from broken formations or from formations that have rallied that end phase can not capture or contest objectives. Aircraft which have landed may not capture an objective on the same turn that it lands. However, a landed aircraft may immediately contest an objective. Check at the end of each turn to see how many objectives you control. Objectives do not have a “memory” and you will lose control of any you have captured if there are no friendly units within 15cms of them at the end of any subsequent turn.

Setup Spacecraft & Garrisons

If either player is using spacecraft then they are set up now before any other units (see rulebook 4.3). Units entering play via planetfall should be placed to one side at this time too (see rulebook 4.4). On-table garrison units are set up after spacecraft have been set up. The following types of formations may be set up on the table as “garrisons” at the start of the game:

- Formations where half or more of the units (rounding up) are scouts OR
- Formations where no more than one of the units has a move greater than 15cms, and where none of the units are war engines OR
- Any formations that include units with a speed of 0 (zero).

Players take it in turns to set up one garrison at a time, starting with the player with the higher strategy rating. Garrisons must be set up so that they have at least one unit within 15cm of an objective in the player’s own half of the table. No units may be set up in the opponent’s half of the table or in impassable terrain. Units may be set up in dangerous terrain (it’s assumed that they took their time getting into position in order to do so safely!) Each player may start up to two of their garrisoned formations on Overwatch. These formations represent sentries deployed as a trip wire and to provide security at the objectives.

They are assumed to have gone on Overwatch in their previous Action phase. That Overwatch is “carried over” into the first turn.

Setup Remaining Formations

All of the remaining formations in the players’ armies must be set up within 15cms of their own side’s table edge or be kept back “in reserve”. The players take it in turn to set up these formations one at a time, starting with the player with the higher strategy rating. Units kept in reserve must either be aircraft, or be going to enter play in a transport aircraft or by teleportation. Reserve formations entering play in aircraft or by teleportation should be placed aside with units that will enter play via planetfall. These formations are not “secret” and your opponent may inspect them at any time. Units being transported must start the game already loaded into the transport vehicle that will bring them into play (i.e., an aircraft or unit with the planetfall ability). Formations entering play in aircraft or from spacecraft can do so on any turn, following the rules for transport aircraft and planetfall (see rulebook 4.2.5 and 4.4). Formations that are in reserve may not carry out any game functions or use special abilities they may have.

Victory Conditions

You must check to see if either player has won at the end of the third and fourth game turns. If neither player has won at the end of the fourth turn then the “tiebreaker” rule is used to determine the winner. Each player is trying to achieve five things known as goals. You win if you have achieved two of these goals in the end phase of turns three or four, and you have achieved more goals than your opponent. The five goals are:

Blitzkrieg, Break Their Spirit, Defend The Flag, Take And Hold, and They Shall Not Pass.

Blitzkrieg: You achieve this goal by capturing the objective that was set up on the opponent’s table edge at the start of the game (i.e., the first objective each player set up).

Break Their Spirit: You achieve this goal by destroying (not breaking) the formation worth the most points in the opposing army. If several formations are tied for the most points, you achieve this goal by destroying any one of them.

Defend The Flag: You achieve this goal if you control all three objectives in your half of the table.

Take And Hold: You achieve this goal by capturing a total of two objectives in your opponent’s half of the table.

They Shall Not Pass: You achieve this goal if there are no unbroken enemy formations in your half of the table.

If neither player has won at the end of the fourth or any subsequent turn then both players roll a D6 to see if the game carries on another turn or ends in a tiebreak. If both players roll the same number then the game carries on for another turn and the players must roll again at the end of the next turn to see if the game ends or carries on another turn, and so on. If the players roll different numbers then the game ends in a tiebreak. Each player scores a number of victory points equal to the full points value of any enemy formations that have been completely destroyed, plus the full points value of any enemy formations that are broken and have been reduced to half strength or less, plus half the value of any formation reduced to half strength or less but is not broken, plus half the value of any formation that is broken but is above half strength. Whoever has the higher points score is the winner. For the purpose of this rule, a formation’s “strength” is equal to the number of units in the formation plus the (remaining) damage capacity of any war engines.

Special Rules

Brutal. After a formation with a unit(s) that are *Brutal* win an assault, but before hack downs are calculated, it gains an additional hit for the purposes of calculating hack downs. This bonus does not contribute to determining the winner of an assault. The unit is simply more effective at cutting/gunning down fleeing troops.

Allies. Armies may ally with a wide range of factions in the Heresy supplement, while some are easily incorporated into your force others have a disruptive effect on your overall strategy. Any formations from a “Disruptive” ally reduce the army’s strategy rating by one (-1). Additionally, Supreme Commander rerolls may not be used on “Disruptive” ally formations. Allied force selections must comply with any restrictions within their own army lists. When including formations from an ally army list, the restrictions for Space Craft and Supreme Commanders are applied across the entire force. Only one Supreme Commander can be selected and they must come from the primary army list. For example, an allies line detachment must be purchased before you can purchase an allies support detachment.

Armorbane. Armorbane weaponry is tailored for the destruction of Armored Vehicles. Whether high-velocity sabot rounds or super hot plasma, hits generated by Armorbane weapons reduce the target's saving throw by one (-1). This modifier only applies to the hits generated using the Anti-Tank (AT), Close Combat (CC) or Firefight (FF) to hit value or the Armorbane weapon and that is allocated against Light Vehicles (LV), Armoured Vehicles (AV) or War Engines (WE). This effect is ignored when used against Infantry (INF).

Armoured Spearhead. An army with the special rule *Armoured Spearhead*, may elect to garrison one formation (AV units only) per full 2000 points regardless of the normal restrictions for unit/formation types able to garrison. These formations may be placed on overwatch but still count towards the maximum number of garrisoned units that may overwatch (normally two).

Berserk. Some units are taken with a blood rage before or during a battle, this fury makes them nearly uncontrollable, thirsting for wanton death and destruction. A unit with the *Berserk* characteristic may double it's movement distance when conducting an *Engage* order.

Chain of Command. A force with the *Chain of Command* special rule may include one *Lieutenant Commander* character upgrade in a formation per full 1000 points. The *Lieutenant Commander* does not cost any points and may only be placed in formations that can take the *Praetor* upgrade. These free upgrades count towards a formations upgrade limit and cannot be placed in a formation with another *Praetor* upgrade. If you have more *Lieutenant Commander* upgrades available than valid formations then any excess upgrades are lost.

The negative effect of such a rigid command structure is that the loss of any unit with a CH upgrade in a formation will incur a blast marker on all friendly formations within 15cm of that formation.

Demi-God. A Demi-God unit has three wounds similar to a WE, however, a Demi-God wound capacity has a number of differences to that of a WE. A Demi-God unit must maintain a 5cm unit coherency with its formation unless it possesses the Scout special rule. A Demi-God unit can be allocated hits up to its starting wound capacity. A Demi-God unit requires two blast

markers to be considered suppressed or broken. A Demi-God that loses a damage point does not incur a blast marker, however, when a Demi-God's wounds are reduced to zero, the Demi-God unit is destroyed and all friendly formation within 30cm receive two blast markers. A Demi-God unit does not suffer critical hits when it loses a wound and cannot barge other units like a WE. A Demi-God does not roll a number of hit dice equal to its wounds like a WE and cannot elect to use its FF or CC value like a WE. A Demi-God unit counts as the same unit type as their retinue for transport capacity purposes.

Exploratory Augury Web. Friendly units entering play via the *Teleport* special rule within 15cm of a friendly unit with the *Exploratory Augury Web* do not roll for blast markers.

Feedback. If a unit firing a weapon with the Feedback special rule fails to cause damage when hitting an enemy unit, roll a D6 for each successful armour save the enemy unit made. The firing unit takes a blast marker for each 1 rolled.

Ferocity. Some units are eager to engage an enemy in close quarters. A unit with the special rule, Ferocity, may add a single 5cm range increase to their countercharge move during an assault.

Fleshbane. Some weapons utilise ammunition that is exceptionally effective against infantry units or are specifically designed to rend flesh. Ammunition types might include radiological, biological or chemical munitions, while other equipment might entail serrated blades and poison. A hit generated from a "Fleshbane" weapon attack reduces the target's saving throw by one (-1). This modifier only applies to a hit generated by the Anti Personnel (AP), Close Combat (CC) or Firefight (FF) to hit value of a "Fleshbane" weapon and that is allocated against Infantry (INF) or (LV) units. This effect is ignored when hitting or allocated against Armoured Vehicles (AV) or War Engines (WE).

Lance. A weapon with the *Lance* special rule is designed to destroy heavily armoured targets. An Armoured Vehicle (AV) unit with the *Reinforced Armour* special rule that is hit by a *Lance* weapon is not allowed to re-roll its saving throw. This special rule does not affect Infantry (INF) or Light Vehicles (LV) units.

Legion Astartes. Legion Astartes are renowned for their tenacity and bravery. This is represented by the following changes to the standard rules, which apply to all Legion Astartes units.

- It takes 2 Blast markers to suppress a Legion Astartes unit or kill a unit in a broken formation (ignore any leftover Blast markers).
 - Legion Astartes formations are only considered broken if they have 2 blast markers per unit in the formation (as opposed to the standard blast marker per unit).
 - Legion Astartes formations only count half the number of blast markers in assault resolution (rounding down - note that assault resolution will not receive +1 for having no blast markers if the formation has 1 blast marker before rounding down).
 - When a broken Legion Astartes formation rallies, it receives a number of blast markers equal to the number of units, rather than half this number. Legion Astartes with the Leader special ability remove 2 blast markers instead of 1.
-

Macro-Weapon. Some of the weapons in Epic are extremely powerful. A unit hit by a *Macro-Weapon* is not allowed a saving throw unless they possess Reinforced Armour or an Invulnerable Save. Even then, they may not reroll the saving throw as the weapon makes a mockery of their protective systems. The Macro-Weapon (MW) effect only applies to the unit type of the corresponding "to hit" value. An Anti-Personnel with the to-hit value of AP4+, MW cannot be allocated against an Armored Vehicle (AV) and does not affect the saving throw of the AV.

Remorseless. A broken formation with *Remorseless* when attempting to rally only suffers a -1 modifier to its rally roll for being broken (not -2). (eg. A formation with an initiative rating of 1+ is broken and attempting to rally in the end phase, an opposing formation is within 30cm, the formation only requires 3+ to rally, as opposed to 4+).

Siege. Siege weapons are designed to break fortifications into rubble. A weapon with the Siege special rule gains the Macro-Weapon special rule when attacking a 0cm speed unit. Otherwise, this special rule has no effect.

Singularity. At its height, the Horus Heresy, saw both sides turn to outlawed dark age technologies. *Singularity* weapons are capable of generating a continuous discharge of energy. When rolling to hit, with a *Singularity* weapon, any unmodified to hit roll of six (6), generates an additional attack die. Successive rolls of a natural six can generate additional dice.

Sniper. There are certain units that possess excellent marksmanship skills, weapons with advanced targeting equipment or skills in dueling and assassination. When determining hits from a weapon with the "Sniper" characteristic, roll to hit separately, during step three of the Shooting Procedure or during step four of the Assault Procedure. *Sniper* attacks may be allocated against any target of the attackers choosing, as long as it is a valid target either in range and line of fire or base contact.

The Emperor's Chosen. The Legio Custodes are the Emperor's elite, forged in his image, they gain the following special rules:

- It takes 2 Blast markers to suppress a Legio Custodes unit or kill a unit in a broken formation (ignoring any leftover Blast markers).
 - Legio Custodes formations are only considered broken if they have 2 blast markers per unit in the formation (as opposed to the standard one blast marker per unit).
 - Legio Custodes formations only count half the number of blast markers in assault resolution (rounding down - note that assault resolution will not receive +1 for having no Blast markers if the formation has 1 Blast marker before rounding down).
 - When a broken Legion Custodes formation rallies, it receives a number of Blast markers equal to the number of units, rather than half this number. Legio Custodes with the Leader special ability remove 2 Blast markers instead of 1.
 - Legio Custodes formations halve the number of hackdowns suffered when a formation loses an assault.
-

Void Shields. Some units are protected by void shield generators. Each void shield will stop one point of damage and then go down. Do not make armour saves for damage stopped by void shields, nor allocate blast markers. Once all of the shields have been knocked down, the unit may be damaged normally and you may make saving throws against any hits that are allocated. Hits from close combat ignore void shields but units using their firefight value must first knock down any shields before they can damage the unit. Void shields that have been knocked down can be repaired. A unit can repair one downed void shield in the end phase of each turn. In addition, if a unit regroups it can use the dice roll to either repair a void shield or remove blast markers (e.g., if you rolled a 2 you could repair 2 shields, remove 2 blast markers or repair 1 shield and remove 1 blast marker).

Army Lists

Legion Astartes

Introduction

Legion Astartes armies have a strategy rating of 5 and Legion Astartes formations have an initiative rating of 1+. Up to 1/3 of the army's total points value may be spent on Allies and/or Lords of War. A player may choose to have their army represent one of the unique legions present during the Horus Heresy, a player may only select one unique Legion. The Primarch and unique unit choices become available to the player for inclusion in their army.

Special Rules

Allies. Armies may ally with a wide range of factions in the Heresy supplement, while some are easily incorporated into your force others have a disruptive effect on your overall strategy. Any formations from a "Disruptive" ally reduce the army's strategy rating by one (-1). Additionally, Supreme Commander rerolls may not be used on "Disruptive" ally formations. Allied force selections must comply with any restrictions within their own army lists. When including formations from an ally army list, the restrictions for Space Craft and Supreme Commanders are applied across the entire force. Only one Supreme Commander can be selected and they must come from the primary army list. For example, an allies line detachment must be purchased before you can purchase an allies support detachment.

Demi-God. A Demi-God unit has three wounds similar to a WE, however, a Demi-God wound capacity has a number of differences to that of a WE. A Demi-God unit must maintain a 5cm unit coherency with its formation unless it possesses the Scout special rule. A Demi-God unit can be allocated hits up to its starting wound capacity. A Demi-God unit requires two blast markers to be considered suppressed or broken. A Demi-God that loses a damage point does not incur a blast marker, however, when a Demi-God's wounds are reduced to zero, the Demi-God unit is destroyed and all friendly formation within 30cm receive two blast markers. A Demi-God unit does not suffer critical hits when it loses a wound and cannot barge other units like a WE. A Demi-God does not roll a number of hit dice equal to its wounds like a WE and cannot elect to use its FF or CC value like a WE. A Demi-God unit counts as the same unit type as their retinue for transport capacity purposes.

Exploratory Augury Web. Friendly units entering play via the *Teleport* special rule within 15cm of a friendly unit with the *Exploratory Augury Web* do not roll for blast markers.

Feedback. If a unit firing a weapon with the Feedback special rule fails to cause damage when hitting an enemy unit, roll a D6 for each successful armour save the enemy unit made. The firing unit takes a blast marker for each 1 rolled.

Fleshbane. Some weapons utilise ammunition that is exceptionally effective against infantry units or are specifically designed to rend flesh. Ammunition types might include radiological, biological or chemical munitions, while other equipment might entail serrated blades and poison. A hit generated from a "Fleshbane" weapon attack reduces the target's saving throw by one (-1). This modifier only applies to a hit generated by the Anti Personnel (AP), Close Combat (CC) or Firefight (FF) to hit value of a "Fleshbane" weapon and that is allocated against Infantry (INF) or (LV) units. This effect is ignored when hitting or allocated against Armored Vehicles (AV) or War Engines (WE).

Legion Astartes. Legion Astartes are renowned for their tenacity and bravery. This is represented by the following changes to the standard rules, which apply to all Legion Astartes units.

- It takes 2 Blast markers to suppress a Legion Astartes unit or kill a unit in a broken formation (ignore any leftover Blast markers).
- Legion Astartes formations are only considered broken if they have 2 blast markers per unit in the formation (as opposed to the standard blast marker per unit).
- Legion Astartes formations only count half the number of blast markers in assault resolution (rounding down - note that assault resolution will not receive +1 for having no blast markers if the formation has 1 blast marker before rounding down).
- When a broken Legion Astartes formation rallies, it receives a number of blast markers equal to the number of units, rather than half this number. Legion Astartes with the Leader special ability remove 2 blast markers instead of 1.

Sniper. There are certain units that possess excellent marksmanship skills, weapons with advanced targeting equipment or skills in dueling and assassination. When determining hits from a weapon with the "Sniper" characteristic, roll to hit separately, during step three of the Shooting Procedure or during step four of the Assault Procedure. *Sniper* attacks may be allocated against any target of the attackers choosing, as long as it is a valid target either in range and line of fire or base contact.

Void Shields. Some units are protected by void shield generators. Each void shield will stop one point of damage and then go down. Do not make armour saves for damage stopped by void shields, nor allocate blast markers. Once all of the shields have been knocked down, the unit may be damaged normally and you may make saving throws against any hits that are allocated. Hits from close combat ignore void shields but units using their firefight value must first knock down any shields before they can damage the unit. Void shields that have been knocked down can be repaired. A unit can repair one downed void shield in the end phase of each turn. In addition, if a unit regroups it can use the dice roll to either repair a void shield or remove blast markers (e.g., if you rolled a 2 you could repair 2 shields, remove 2 blast markers or repair 1 shield and remove 1 blast marker).

Iron Hands

"Rest? We were not made to rest; we go on, unflinching, unstoppable, unending in our strength. The Emperor did not make us for such mortal concerns as hearth and home, vanity or contemplation; we are his engines of war, his hammers, beating out the fabric of existence into a vessel fit for Mankind to inhabit."

Ferrus Manus

The Iron Hands are the masters of the engines of war, wielding weapons and armoured tanks with the skill a master swordsman might wield a blade. Proud and relentless, the Legion has fought for many years at the forefront of the Great Crusade, and seen victories uncounted, though many have labelled them as callous and as inhuman as the machines they employ with such devastating skill.

The following formations are available to an Iron Hands army in addition to those in the core legion army list.

Raven Guard

"Swear with me now, my children, to follow me where ever this road may lead. Swear to show no mercy to the Traitors. Swear to slay them with hatred in your heart. Swear to excise this cancer that Horus has nourished in the heart of the Imperium. Swear to bring the Imperial Truth to the galaxy. Swear that we will never fail again."

Lord Corax

The Raven Guard are equal parts light and dark - quick to exact justice and retribution upon the tyrant and the oppressor by striking from the shadows with lightning speed and shocking strength. The annals of the Great Crusade tell relatively few tales of the numerous great deeds the Legion has enacted, for it has ever shunned the glare of adulation. Though the master of the full spectrum of war, the Raven Guard Legion favours the tactics of patience, guile and subtlety. It is adept at reconnaissance and infiltration, of identifying its foe's weakest point and then rapidly striking at that point with precisely applied force.

Salamanders

"Without wisdom, skill cannot be focussed. Without skill, strength cannot be brought to bear. Without strength, wisdom may not be applied."

The Teachings of the Promethean Cult

The Salamanders are the exemplars of forge-wrought duty, masters of artifice and possessed of a fearsome and uncompromising sense of honour. They stand for toil and sacrifice, bearing arms and armour forged to the highest possible standards and often by the Legionaries who bear them into battle. The Legion wields the tools of the smith as weapons of war, bring heat, iron and raw strength of arms to strike down all those who would deny the Imperial Truth or attempt to undermine the Imperium of Man.

Ultramarines

To plunder, to slaughter, to steal, these things have long been misnamed empire. Ours is the better way; after we conquer, we shall rebuild, after we destroy, we will create order. Where once was ruin and slavery, we shall bring civilisation and the Imperial Truth. To those who oppose this great ideal, we will bring the peace of swift ending.

Roboute Guilliman

The Lexus Ultramar

The Ultramarines Legion prosecutes the Emperor's wars with reason, discipline and resolve, every warrior striving to match the example of their Primarch. The most numerous of the Space Marine Legions, they have long formed the bulwark of the Imperium's domains in the Galactic East.

Imperial Fists

"Doubt is the greatest weakness. It can shatter the strongest of walls without a single shot being fired, and fell the mightiest champions before even a sword is drawn."

Rogal Dorn, Primarch of the Imperial Fists

The Legionaries of the VIIth Legion are known as the stoic praetorians of Terra, the embodiment of all that the Great Crusade stands for. They are loyal, disciplined and methodical, and masters of both the attack and the defence. As the Imperium expands ever outwards, so the crusaders of the Imperial Fists are to be found at the very leading edge of Compliance. Then, in the wake of victory, the Imperial Fists construct might fortresses that are as much garrisons against recidivism as they are beacons of Unification, the noblest exemplars of the highest ideals and aspirations of Humanity.

Blood Angels

The Blood Angels, of all the warriors of the Legiones Astartes, evidenced perhaps the greatest degree of transformation of their flesh from their human origins to the Space Marines they would become. This transformation's effects were even more pronounced and more fundamental than that of the Space Wolves or the Salamanders, both of which featured unique stigmata of their own.

Space Wolves

By the late Great Crusade era, the Space Wolves Legion had strongly deviated from the Principia Belicosa's definition of the Legiones Astartes structure and organisation. The Legion's host was now broken down into a shifting array of warrior bands beholden strongly to the personal authority of a particular company commander and below them to a series of tributary sub-commanders, known variously as 'Wolf Lord' (Jar!) or 'Claw Leader' (Thegn), regardless of their notional or accorded rank within the Imperium's order of battle.

Night Lords

"Show your enemy mercy and he shall one day seek vengeance upon you for every petty, imagine slight. Mercy is therefore a weakness; a crime waiting to be born.

Mercy I have long since expunged, both from myself and my legion."

The Night Hunter

Even before the Isstvaan Drop Site Massacre, the Night Lords were renegade in all but name, having entirely devoted themselves to the arts of terror and murder. The Legion's Primarch Konrad Curze is the master of the unheralded strike from the least anticipated corner, an attack delivered with such brutality and wanton cruelty entire planetary populations were brought to their knees in abject surrender. Never given to mercy, few who oppose the Night Lords ever live to tell the tale, unless they are allowed by design to escape to sow the seeds of dread still further. Given the dark demeanour of the Legion, it takes an equally ruthless leader to rein in it's propensity to atrocity, at least until such time as it is called for.

World Eaters

"Monuments are dust, tales merely words, soon forgotten, but blood... blood is forever."

The Primarch Angron

Of all the Space Marine Legions in the Emperor's service, the World Eater's were among the most feared, the whisper of their coming was enough to quell rebellion and send armies to flight in terror. Tales of their predations and massacres were numberless, and their reputation was as the Emperor's war hounds, as such a name they once carried ~ beasts, butchers and madmen whose fury was fuelled by bloodshed, and was such that no sane warrior would stand willingly against them.

Emperors Children

*"Pride Goeth Before Abandon
Vanity Goeth Before Weakness
VainGlory Goeth Before the Fall."*

The Cantos of Proverbs
Aprocrypha Terra

The Emperor's Children have always striven to be exemplars above all others in the arts of war; paragons of martial virtue and excellence, scorning those who do not meet their own, perhaps unattainable, standards. This led them to seek perfection in war as a fluid, lightning-quick force whose battles were preordained victories brought about by a combination of acute strategic planning and flawless execution. Their attitudes and manner led some to name them as arrogant and vainglorious long before the Heresy, but the Legion's warriors were always ready to answer such slight with blood.

Iron Warriors

"Victory is not an abstract concept, it is the equation at the heart of strategy. Victory is the willingness to expend lives and munitions in attack, overmatching the defenders reserves of manpower and ordnance. As long as my Iron Warriors are willing to pay any price in the pursuit of victory, we shall never be defeated."

Perturabo, Master of the Iron Warriors

The Iron Warriors are the grim faced, cold hearted masters of the science of war, the exemplars of strength and discipline turned exclusively to the destruction of an enemy. The Legion is commanded by its Lord Primarch as an extension of his own mind and body, the will of each Legionary utterly sublimated to his conception of victory. More so than in any other Legion, the life of each warrior is secondary to his duty, as much a resource to be expended in the relentless calculus of war as bolt shell or lascannon charge. Guided by such doctrines, the Iron Warriors are the most relentless and dogged siege warriors in the ranks of the Legiones Astartes and countless fortresses have been reduced to ashes under their guns throughout the Great Crusade.

Death Guard

"Pain is an illusion of the senses, fear an illusion of the mind, beyond these, only death waits as silent judge over all."

The Primarch Mortarion

The Death Guard are stalwart and implacable fighters who have made a specialty of both endurance under the harshest circumstances and of overcoming the most nightmarish and inhospitable war zones. Their name is a byword for unflinching determination and victory through bloody, gruelling attrition when all else fails, as well as for expertise in the darker arts of warfare, such as the use of bio-alchemical and radiation weaponry.

The following units replace or are available to a Death Guard Army in addition to the core legion list. A Deathguard Army cannot take a Legion Assault Marine Detachment as a Line Detachment.

Word Bearers

"Mankind's stoicism in the face of suffering is founded on its ignorance of the alternatives."

Erebus, First Chaplain of the Word Bearers

Where once the XVIIth Legion brought the light of the Emperor to benighted humanity, now the Word Bearers bring the blinding darkness of Old Night. No longer drive by duty or honour, but by the thirst for forbidden lore and undeserved power, they seek to bind the Warp itself and enslave its denizens to their will. When the Word Bearers march to war, the fabric of reality is distorted and the dread things of the Abyss march at their side. To stand against the Word Bearers is to invite insanity, death and, unknown to most yes the worst fate of all, the damnation of the eternal soul.

Sons of Horus

"For a warrior, the only crime is cowardice."

Horus Lupercal

In the case of the Sons of Horus, the combat doctrines of this most aggressive Legion were those of the application of overwhelming force directed to where the foe was weakest. These shattering blows were used to utterly destroy enemy command cadres, vital strategic support structures and wreak terrible slaughter upon the pride of an enemy's forces, often turning the tide of an entire conflict with a single, well placed and savage attack. Even on a personal level, the Sons of Horus took this merciless doctrine to heart and, like the wolves they were once named for, were swift to exploit a foe's weakness, surrounding and brutally tearing apart an outnumbered or exposed enemy before they could recover from the shock of an assault.

Alpha Legion

Of all the Legiones Astartes, the least is known for certain of the Alpha Legion. The annals of the Great Crusade make mention of the Legion, but invariably each entry contradicts some other. All that is known is that the warriors of the Alpha Legion are the masters of misdirection and guile. Most foes have no inkling they are even fighting before the Alpha Legion's master stratagems cause their defences to collapse beneath them, torn apart from within so that when the final overwhelming attack comes, the enemy's defeat is total.

Legio Custodes

Introduction

The Legio Custodes are the bodyguards and sworn protectors of the Emperor, his chosen emissaries, and, should the need arise, his most deadly executioners. Legio Custodes armies have a strategy rating of 1+ and Legio Custodes formations have an initiative rating of 1+. Legio Custodes can spend up to 1/2 of the total points value on Allies and/or Lords of War.

Special Rules

The Emperor's Chosen. The Legio Custodes are the Emperor's elite, forged in his image, they gain the following special rules:

- It takes 2 Blast markers to suppress a Legio Custodes unit or kill a unit in a broken formation (ignoring any leftover Blast markers).
- Legio Custodes formations are only considered broken if they have 2 blast markers per unit in the formation (as opposed to the standard one blast marker per unit).
- Legio Custodes formations only count half the number of blast markers in assault resolution (rounding down - note that assault resolution will not receive +1 for having no Blast markers if the formation has 1 Blast marker before rounding down).
- When a broken Legion Custodes formation rallies, it receives a number of Blast markers equal to the number of units, rather than half this number. Legio Custodes with the Leader special ability remove 2 Blast markers instead of 1.
- Legio Custodes formations halve the number of hackdowns suffered when a formation loses an assault.

Line Detachments

Legio Custodes Line Detachments can only take each upgrade once.

Detachment	Unit	Upgrades	Cost
Hykanatoi Detachment	6 Sentinel Guard OR 6 Custodian Guard units OR 6 Sagittarum Custodes	Captain-General OR Senior Officer, Teleport, Carrier	350 pts
Kataphraktoi Detachment	6 Custodes Agamatus units	Senior Officer	300 pts

Support Detachments

Three Support Detachments may be chosen per Line Detachment. Legion Custodes Support Detachments can only take each upgrade once.

Detachment	Unit	Upgrades	Cost
Tharanatoi Detachment	4 Aquilion Terminators	Captain General OR Senior Officer, Carrier OR Teleport	375 pts

Solar Auxilia

Introduction

Solar Auxilia armies have a **Strategy Rating of 3**. All formations have an **Initiative rating of 2+**. Two Solar Auxilia Support Detachments may be chosen for each Solar Auxilia Line Detachment. Each detachment may purchase up to three upgrades, each upgrade can only be chosen once per detachment.

Up to 1/3 of the army's points may be spent on Allies or Lords Of War.

Special Rules

Transports

Dracosan Armoured Transport and Stormlord units may only transport units from their own formation. I.e. the rules for War Engine transports do not apply to them when using the Solar Auxilia army list.

Legate Commander

A Solar Auxilia army may include one Legate Commander character per 500 points, or part thereof, in the army. The Legate Commanders do not cost any points. Legate Commander units may be added to the army at the start of the battle before either side sets up. If the army includes a Lord Marshall, then the first Legate Commander must be attached to the Lord Marshall's formation. Any further Legate Commanders may be attached to any other formations. You may not include more than one Legate Commander per formation. You may not add a Legate Commander to an Imperial Navy or allied formation. If you have more Legate Commanders than formations, any excess is lost.

Allies

Allies. Armies may ally with a wide range of factions in the Heresy supplement, while some are easily incorporated into your force others have a disruptive effect on your overall strategy. Any formations from a "Disruptive" ally reduce the army's strategy rating by one (-1). Additionally, Supreme Commander rerolls may not be used on "Disruptive" ally formations. Allied force selections must comply with any restrictions within their own army lists. When including formations from an ally army list, the restrictions for Space Craft and Supreme Commanders are applied across the entire force. Only one Supreme Commander can be selected and they must come from the primary army list. For example, an allies line detachment must be purchased before you can purchase an allies support detachment.

Disruptive allies: Mechanicum Taghmata, Daemons Of The Ruinstorm

Mechanicum Taghmata

Introduction

Mechanicum Taghmata armies have a **Strategy Rating of 3**. All formations have an **Initiative rating of 2+**.

Special Rules

Automaton. A formation does not receive a Blast marker when a unit with automaton is destroyed, this includes the extra Blast marker from the first casualty of a crossfire and for units destroyed for being out of formation after a move. Automaton units hit by a weapon with disrupt do take a Blast marker however. If a hit is inflicted on an automaton unit because it is in a broken formation which is receiving a Blast marker (see Blast Markers and Broken Formations) then it may attempt to save normally.

Cortex Controller. Allows any formation containing units with the Cybernetica Cortex rule to operate normally, for the purpose of selecting an action and activating, as long as that formation has a unit within 15cm of a unit with this special rule.

Cybernetica Cortex. Formations containing units with the Cybernetica Cortex rule suffer a -1 initiative penalty and may not perform March or Overwatch actions, if there are no friendly units with the Cortex Controller special rule within 15 cm of the formation.

Lance. A weapon with the *Lance* special rule is designed to destroy heavily armoured targets. An Armoured Vehicle (AV) unit with the *Reinforced Armour* special rule that is hit by a *Lance* weapon is not allowed to re-roll its saving throw. This special rule does not affect Infantry (INF) or Light Vehicles (LV) units.

Singularity. At its height, the Horus Heresy, saw both sides turn to outlawed dark age technologies. *Singularity* weapons are capable of generating a continuous discharge of energy. When rolling to hit, with a *Singularity* weapon, any unmodified to hit roll of six (6), generates an additional attack die. Successive rolls of a natural six can generate additional dice.

Void Shields. Some units are protected by void shield generators. Each void shield will stop one point of damage and then go down. Do not make armour saves for damage stopped by void shields, nor allocate blast markers. Once all of the shields have been knocked down, the unit may be damaged normally and you may make saving throws against any hits that are allocated. Hits from close combat ignore void shields but units using their firefight value must first knock down any shields before they can damage the unit. Void shields that have been knocked down can be repaired. A unit can repair one downed void shield in the end phase of each turn. In addition, if a unit regroups it can use the dice roll to either repair a void shield or remove blast markers (e.g., if you rolled a 2 you could repair 2 shields, remove 2 blast markers or repair 1 shield and remove 1 blast marker).

Allies. Armies may ally with a wide range of factions in the Heresy supplement, while some are easily incorporated into your force others have a disruptive effect on your overall strategy. Any formations from a “Disruptive” ally reduce the army’s strategy rating by one (-1). Additionally, Supreme Commander rerolls may not be used on “Disruptive” ally formations. Allied force selections must comply with any restrictions within their own army lists. When including formations from an ally army list, the restrictions for Space Craft and Supreme Commanders are applied across the entire force. Only one Supreme Commander can be selected and they must come from the primary army list. For example, an allies line detachment must be purchased before you can purchase an allies support detachment.

Line Detachments

A line detachment may choose up to four upgrades, each upgrade for that detachment can only be chosen once and only one transport option may be selected.

Legio Titanicus

Introduction

Legio Titanicus armies have a strategy rating of 3. Legio Titanicus formations have an initiative of 1+.

Special Rules

Void Shields. Some units are protected by void shield generators. Each void shield will stop one point of damage and then go down. Do not make armour saves for damage stopped by void shields, nor allocate blast markers. Once all of the shields have been knocked down, the unit may be damaged normally and you may make saving throws against any hits that are allocated. Knight Household

Introduction

Knight Household armies have a Strategy Rating of 3. All formations have an Initiative rating of 2, however, Knight Household formations receive a +1 modifier to their action test when carrying out an engage action, and a +1 modifier to their rally test. For each Knight Household Line Detachment, you may select two Knight Household Support Detachments. Detachments may choose any number of upgrades, however each upgrade can only be chosen once per detachment.

Special Rules

Allies. Armies may ally with a wide range of factions in the Heresy supplement, while some are easily incorporated into your force others have a disruptive effect on your overall strategy. Any formations from a “Disruptive” ally reduce the army’s strategy rating by one (-1). Additionally, Supreme Commander rerolls may not be used on “Disruptive” ally formations. Imperial Militia

Introduction

Imperial Militia armies have a Strategy Rating of 2. All Imperial Militia formations have an Initiative rating of 2+. An Imperial Militia player may spend up to 1/3 of its total points value on Allies/Lords of War. When selected as allies for another army, some armies will state the restriction Imperial Militia (Traitor Militia). When an Imperial Militia (Traitor Militia) army is selected, at least one detachment must take the *Traitors* provenance upgrade.

Special Rules

Berserk. Some units are taken with a blood rage before or during a battle, this fury makes them nearly uncontrollable, thirsting for wanton death and destruction. A unit with the *Berserk* characteristic may double its movement distance when conducting an *Engage* order.

Dedicated War Engine Transports. Gorgon Armoured Transports may only transport units from their own formation. The standard rules for war engine transports do not apply to them when using the Imperial Militia army list.

Discipline Masters / Rogue Psykers. An Imperial Militia army may include one Discipline Master character per 500 points, or part thereof, in the army. The Discipline Masters do not cost points. If a player elects to take Discipline Master characters, they must be added to the army prior to the start of the battle before set up. If the army includes a Force Commander then the first Discipline Master must be attached to formation containing the Force Commander. If a Force Commander is not present in the Army, then the first Discipline Master must be placed in the most expensive Imperial Militia Line Formation. Any further Discipline Masters may be attached to any other Imperial Militia formations. You may not include more than one Discipline Master per formation. You may not add a Discipline Master to an Imperial Navy or allied formation. If you have more Discipline Masters than formations, any excess are lost. A Rogue Psyker may be exchanged for a Discipline Master in a formation that has taken the *Traitors* Provenance upgrade.

Provenance. Certain formations may purchase a Provenance upgrade. Only two types of provenance may be applied across the army. Any eligible formation may purchase one of the two provenance selections. The provenance upgrade will modify the unit values for all infantry (INF) units in the formation in one of the following ways:

Warrior Elite: +1 Firefight (FF) value

Survivors of the Dark Age: +1 Armour save (Armour) value

Feral Warriors: +1 Close Combat (CC) value

Traitors: gain the Berserk special rule. Ogryn Brute Squad units chosen in a formation with the Traitors Provenance must choose the Chaos Spawn Mutations option.

For example, an Inducted Levy squad has purchased the Feral Warriors upgrade. All of the levy Auxiliary units in the formation will modify their regular (CC) value of 6+ to (CC) 5+.

Exploratory Augury Web. Friendly units entering play via the *Teleport* special rule within 15cm of a friendly unit with the *Exploratory Augury Web* do not roll for blast markers.

Allies. Armies may ally with a wide range of factions in the Heresy supplement, while some are easily incorporated into your force others have a disruptive effect on your overall strategy. Any formations from a “Disruptive” ally reduce the army’s strategy rating by one (-1). Additionally, Supreme Commander rerolls may not be used on “Disruptive” ally formations. Allied force selections must comply with any restrictions within their own army lists. When including formations from an ally army list, the restrictions for Space Craft and Supreme Commanders are applied across the entire force. Only one Supreme Commander can be selected and they must come from the primary army list. For example, an allies line detachment must be purchased before you can purchase an allies support detachment.

Line Detachments

Line Detachments may only take one of each upgrade type. Line Detachments may only take a total of four upgrades per detachment.

Detachment	Unit	Upgrades	Cost

Allies

Cohesive allies: Legio Titanicus, Legion Astartes, Knight Household

Disruptive allies: Solar Auxilia, Mechanicum Taghmata, Daemons Of The Ruinstorm (Traitor Militia)

Daemons of the Ruinstorm

Introduction

Daemons Of The Ruinstorm armies have a **Strategy Rating of 2**. All detachments have an **Initiative rating of 2+**. For each Daemonic Horde detachment taken, one Follower of Chaos detachment (of the same god affiliation or undivided) may be selected. 0-1 Greater Daemon Hordes (up to one Greater Daemon Horde per god affiliated Daemonic Horde) may be selected, so long as a Daemonic Horde detachment of the same god affiliation has been selected.

Daemonic Horde detachments and Followers of Chaos detachments may take any number of Gifts of Chaos. Each upgrade may only be selected once per detachment.

Special Rules

Berserk. A unit with the Berserk characteristic may double its movement distance when conducting an Engage order. Additionally, formations containing Berserk units can not claim objectives under the GT scenario.

Instability. The power of the Warp is fickle and unpredictable, even for those born of its seething currents. Any Daemonic Hordes detachment that fails an initiative test, for any reason, immediately loses 1D3 Lesser Daemons (INF). These losses do not cause any Blast markers, though the detachment may break if this causes them to have more Blast markers than units. Detachments without Lesser Daemons (INF) are still subject to this rule though, in practice, it has no effect on them.

Chaos Gate. Chaos Gates are breaches in the walls of reality that allow the forces of Chaos direct access from their foul realms. A Chaos Gate included in the army allows the Chaos player to pick up to three other detachments, and keep them within the Warp instead of deploying them normally. Any detachments that are kept within the Warp may enter play via the Chaos Gate, by taking an action that allows them to make a move, and then measuring their first move from the centre of the Chaos Gate objective marker. No more than one detachment may travel through a Chaos Gate each turn.

Daemonic Assault. Spilling from rents in the fabric of reality, a daemonic assault can come from any angle giving the defenders no possibility of forming a coherent defence. Before deployment, the daemon player may nominate one detachment in their army per full thousand points (or if used as allies, one detachment per thousands points of allied points allotment) to deploy by teleport. These detachments may only enter play from the second turn and may contain any units, with the restriction of only containing a single greater daemon unit.

Allies. Daemons Of The Ruinstorm forces may corrupt and control almost any mortal soul. Some minds are easily controlled whilst others cause a disruption in the warp. Any formations from a "Disruptive" ally reduce the army's strategy rating by 1 and Supreme Commander rerolls may not be used on "Disruptive" ally formations. Allied units may only be chosen from one additional army list. Allied Detachment and Support Detachment force selections must comply with any limitations within their own army lists, however, Allied Lord of War units may be freely chosen. Up to 1/3 of the army's points value may be spent on Allies and Lords Of War units. Supreme Commander units may only be chosen from the Daemons Of The Ruinstorm army list.

When Daemons Of The Ruinstorm are used as allies to other armies, some army ally charts will have the qualifier "**Daemons Of The Ruinstorm (god)**". This means that any Daemons Of The Ruinstorm units taken as allies from that army may only be undivided or of that specific chaos god.
